## **OPTERGY COMPLETES SUCCESSFUL PRODUCT LAUNCH AT 2016 AHR EXPO**

### **Proton, your web-based supervisor controller**

Issaquah, WA (February 1, 2016) – Optergy, a provider of building automation and energy management software, have successfully launched a web-based supervisor controller solution to thousands of HVAC professionals at last week's 2016 AHR Expo in Orlando, Florida.

Optergy unveiled Proton, catching many visitors' attention and receiving very positive feedback as an integrated building management solution.

Optergy are heavily invested in continuing to develop high-quality building management and reporting solutions. For buildings small and large, Optergy is the industry leader in system integration, and Proton proves why, combining value and economy into an IoT appliance, making it one of the most cost-effective supervisor controllers available in the market for small buildings.

Optergy featured these products at the expo:

- Optergy Enterprise for complete system management. Having been installed in over 2,000 sites worldwide, this innovative software solution combines energy and building management features to help extend the life of business assets, increase system availability and reduce maintenance costs.
- Proton combines up to 50 building devices into a real-time energy usage reporting system, allowing live monitoring, control, reporting and analysis from any web-based device. A live demonstration of the new software was available at the booth.
- Optergy app allows stakeholders to experience building management in a way never before seen, providing live data for quick and simple monitoring and control, anytime, anywhere.

The show generated a tremendous number of potential partners from North America, Mexico, Canada and around the world and we are eagerly looking forward to working with them in the near future. To become an Optergy reseller, our process is as simple as 1-2-3; meet with us to see if you are a good fit, sign a reseller agreement, get trained and get going.

The next tradeshow Optergy will be exhibiting at is NFMT which will be held from March 22 – March 24, 2016, in Baltimore, Maryland. For more information on Optergy or to become a reseller please visit [www.optergy.com](http://www.optergy.com) or contact us at [info@optergy.com](mailto:info@optergy.com).
